

# Expert Pallet Nailing Machine:

making pallet production easier with less effort.

**Adjusting handle**

**Leveling base**

The Expert is designed for the manual production of small quantities of pallets with special dimensions. The machine is ergonomic, height-adjustable, and positioned at an adjustable angle, making the work less physically demanding. The unique feature of the Expert is that the pallet is assembled in a single step, without the need to separately manufacture the bottom and top decks. This increases efficiency and productivity.

## Cost-effective reasons for use:

- Efficient pallet production by a single operator.
- Ergonomically height.
- Adjustable nailing position at approximately 45 degrees.
- Versatile adjustment for all types of pallets, saving on the cost of additional templates.

## Features Expert

Min. pallet sizes 540 x 650 mm

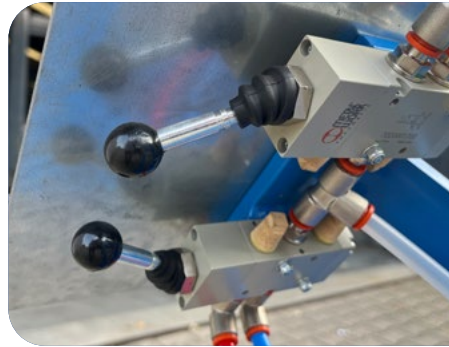

Max. pallet sizes 1350 x 1600 mm

Infinitely adjustable template

For both block and stringer pallets

Finished pallets are ejected pneumatically

Air buffer in frame
